ABSTRACT

Neta Melasari. 2022. “*The Use of Think Pair Strategy in Teaching English Speaking Skill at SMPN 11 South Bengkulu in Academic Year 2021/2022*”.

(Classroom Action Research at the Grade IX of SMPN 11 South Bengkulu in Academic Year 2021/2022)

Advisor I: Dr. H. Ali Akbarjono, M.Pd

Advisors II: Valisneria Utami, M.Ed.

This research is a research that aims to find out the use of think pair share strategies to improve students' speaking skills. The subjects of this study were the ninth grade students of SMPN 11 Bengkulu Selatan for the academic year 2021/2022. Students consist of 30 students in one class as respondents. This study also aims to find out how the process of learning to speak using the think pair share strategy. This research was conducted using classroom action research methods. To analyze the data of this study using test and non-test techniques, the tests were given to students in two cycles. The results of the data analysis showed that there was an increase in students' speaking ability from each cycle. This is shown from the pre-cycle average of 66.55, after using the think pair share strategy in the first cycle there was an increase in the student's average result, namely 71.177 and for the second cycle after reflection there was an increase. an increase in the average student of 77.55. Moreover, in the first cycle there were 53.333% (16 students out of 30 students) who got a score of 755.

Key words : *Speaking Skill, Think Pair Share Strategy.*

ABSTRAK

Neta Melasari. 2022. “Penggunaan Strategi Think Pair dalam Pengajaran Keterampilan Berbicara Bahasa Inggris di SMPN 11 Bengkulu Selatan Tahun Pelajaran 2021/2022”.

(Penelitian Tindakan Kelas Pada Siswa Kelas IX SMPN 11 Bengkulu Selatan Tahun Pelajaran 2021/2022)

Pembimbing I: Dr. H. Ali Akbarjono, M.Pd

Pembimbing II: Valisneria Utami, M.Ed.

Penelitian ini membahas analisis yang bertujuan untuk mengetahui penggunaan strategi think pair share untuk meningkatkan kemampuan berbicara siswa. Subjek penelitian ini adalah siswa kelas sembilan SMPN 11 Bengkulu Selatan tahun pelajaran 2021/2022. Terdiri dari satu kelas dengan 30 siswa sebagai responden. Penelitian ini bertujuan untuk mengetahui proses pembelajaran berbicara dengan strategi think pair share. Untuk mengetahui peningkatan kemampuan berbicara siswa dengan menggunakan strategi think pair share. Penelitian ini dilakukan dengan menggunakan penelitian tindakan kelas. Teknik analisis data yang digunakan dalam penelitian ini adalah teknik tes dan teknik nontes, tes yang diberikan kepada siswa berupa siklus I dan siklus II. Hasil analisis data menunjukkan bahwa ada peningkatan kemampuan berbicara siswa dari setiap siklus. Hal ini ditunjukkan dari rerata pra siklus 66,5, setelah penggunaan strategi think pair share pada siklus I terjadi peningkatan hasil rerata siswa yaitu 71,17 dan untuk siklus II setelah refleksi terjadi peningkatan. peningkatan rata-rata siswa sebesar 77,5. Apalagi pada siklus I terdapat 53,33% (16 siswa dari 30 siswa) yang memperoleh nilai 75. Pada siklus II terdapat 100% (30 siswa dari 30 siswa) yang mendapat nilai 75.

Kata kunci : *Keterampilan Berbicara, Strategi Think Pair Share.*

CHAPTER I

INTRODUCTION

A. Background

Speaking skill is the ability to convey feelings and ideas in spoken language. Speaking skills are the most important part of everyday life because speaking can produce tens of thousands of people and thousands of words. As humans, people learn to speak at least one language as they grow older. Speaking skills can form an opinion or a new idea about something to be informed directly.

In addition, speaking is an activity that involves someone to exchange ideas through talking. Richards (2008: 19) states that speaking skills are part of one's activities to interact with other people. By speaking, students will be able to express ideas and feelings spontaneously with other people. Students can also share the information they know, suggest something and comment with others through communication. There are so many difficulties that students

experience when speaking, especially speaking English, for example, lack of vocabulary that can have an impact on confidence to speak, an uncomfortable environment also makes them not confident to speak and not focus, and many more.

Some students at school sometimes still hesitate in speaking English in class. Due to the lack of opportunities given by educators to students to speak, the use of strategies in the learning process that is still monotonous or not varied and students' lack of motivation to focus more on learning English. For example, according to student information during the learning process, the teacher only explained the material with a lecture, then students were asked to listen and answer questions according to the material being taught. From these activities, it can be seen that the activeness of students in learning is still very low, especially speaking activities, so students will feel bored and not interested in participating in learning.

This fact makes teachers have to play an important role in paying attention for the process of teaching speaking to continue to develop students' communicative abilities. As a result, teachers must be able to create a student learning process by using good strategies in teaching English that are more interesting and effective, fun so that students can actively speak. Nunan (2003) explains that the language teaching method is a set of procedures that the teacher must follow in the classroom. Methods are needed to motivate students to learn and help students understand the material they are studying. A method will be a bridge between teachers and students in processing material in the learning process.

Based on pre-observation and interviews with english teachers at SMPN 11 South Bengkulu, learning speaking skills is still not effective so that students' speaking skills are low. The speaking ability of students is on average 50%, while the learning outcomes of students' speaking skills who

have reached the KKM are 40% as evidenced by the final grades of students. When the researcher made observations during the school, the researcher observed that during the teaching and learning process in the classroom and there are some students who less confident when asked by the teacher to answer. Some students whose body movements or body language are still lacking when speaking, students have not been able to adjust the components of speech such as vocabulary, students also have difficulty spelling and arranging sentences in spoken form, the classroom atmosphere when learning English also looks monotonous.

With these facts, the researcher interested in using the Think Pair Share strategy in learning speaking skills to improve these speaking skills. The TPS learning model is a discussion strategy to increase student participation in class. In this model, students work in pairs by thinking about a problem, then brainstorming and then sharing. Barkley said that the "Pair" and "Share" components can encourage and

compare their understanding of others thereby increasing willingness and readiness to speak in larger groups (Lyman: 1987).

This study aims to determine whether using the Think Pair Share strategy can improve the speaking skills of class IX A students at SMPN 11 South Bengkulu or not, and to find out the advantages and disadvantages of implementing a discussion using the Think Pair Share strategy to improve students' abilities. ' ability. speaking skills. The researcher wants to use the Think Pair Share problem that occurs in the teaching and learning process of speaking in class. The researcher say the Think Pair Share strategy is more interesting and fun. And can make enjoy in learning and teaching speaking English. So it will help the teacher in teaching speaking. Therefore, the researcher conducted this research with the title "The Use of Think Pair Share Strategy in Teaching English Speaking Skill at SMPN 11 South Bengkulu, Academic Year 2021/2022".

B. Identification of the Problem

Based on the description presented above in the background of the problem above, the researcher will identify the following problems:

1. Students do not have confidence in speaking.
2. Students interest in speaking is still lacking.
3. The average students still get a score below the KKM.
4. Strategy was used by teacher learning English is monotone.

C. Research Question

Based on the background, the problem of this research is the lack of students speaking skill at class XI SMPN 11 South Bengkulu. The researcher formulates the following problems:

How could Think Pair Share Strategy increase speaking skill at SMPN 11 South Bengkulu?

D. The Limitation of the Problem

- a. The subject of this research is at Class XI SMPN 11 South Bengkulu in Academic year of 2021/2022.
- b. The research only investigates how “Think Pair Share strategy” can improve students speaking skill.

E. Research Objective

The objective of this study to improve students' speaking skills using the Think Pair Share strategy.

F. Research Significance

The significance of this study will be explained as follows:

1. This study could improve students interest and ability in learning speaking by using Think Pair Share strategy.
2. This study would be useful for the school because this technique contributes to fulfill the schools target in improving students speaking skill.

3. This study is expected to improve teachers knowledge about varios strategy in teaching speaking especially Think Pair Share strategy.
4. This study would be useful for other researchers as their references in conducting their research.

G. Definition of Key Term

To avoid misunderstanding in understanding research entitled The Use of Think Pair Share Strategy in Teaching English Speaking Skill at SMPN 11 South Bengkulu, the terms in the title are as follows :

1. Speaking

Speaking is an oral interaction. Involving two or more people to interact with each other and share opinions or ideas. That is, speakers must communicate with others. Therefore, speaking is communication that is carried out through direct interaction and verbal exchange that occurs between two or more people Richards (2008: 19).

2. Think-Pair-Share (TPS)

Think-Pair-Share (TPS) In this model, students work in pairs with think of a problem, then exchange ideas and then share. Barkley said that the "Pair" component (partners) and "Share" (sharing) can encourage and compare their understanding of others so as to increase the willingness and readiness to speak in groups bigger (Lyman :1987).

CHAPTER II

LITERATURE REVIEW

A. English Speaking Skill

1. The Nature of Speaking Skill

Speaking skills are expressing something orally, where there are speakers and listeners, speakers who can convey a language and listeners get information and process that information speaking skills are very important to master, especially in the teaching and learning process. The 2013 curriculum explains that speaking skills aim to make students able to specifically master many things ranging from transactional, interpersonal, and direct goals in life and in society, in concrete and imaginative ways. This should be mastered and done by students when they can speak well around them, especially if they learn to speak English.

According to Spratt (2005: 34) states that speaking skills are productive skills. Using good and clear speech acts aims to convey meaning or ideas to others appropriately so that people are able to understand what is being conveyed. In speaking skills, creating verbal exchanges with others to provide clear information. That is, express something or what they feel verbally. Speaking is a process of interacting with each other, using verbal language and must be able to be mastered by learning and applying it, especially for the use of everyday conversations where speakers can interact with each other in conversation and produce an understanding.

According to Richards (2008: 19), speaking skills are oral interactions. The verbal interaction involves two or more people interacting and sharing opinions or ideas. That is, speakers must communicate with other people, for example through group work, working on joint tasks,

and other strategies they present accessible sequences. Therefore, speaking is communication that is carried out through direct interaction and verbal exchange that occurs between two or more people.

Based on the theory above, it can be concluded speaking skills are skills that enable us to communicate effectively because it is done verbally. The speaker provides the ability to convey information verbally and can be understood by the listener.

2. Speaking Aspect

A speaker when he wants to convey something he must determine what aspects will be discussed. Brown (2001) states that there are four aspects of speaking that students should pay attention to in speaking skills, namely:

a. Pronunciation

In the Oxford dictionary (2008) states that pronunciation is a language or certain words or sounds spoken clearly. In addition, the AMEP Research Center (2002) explains that pronunciation aims at the production of sounds that we use to convey meaning clearly.

b. Grammar

Harmer (2001: 12) states that grammar is a description of how to change words and can be combined into sentences that are good in language pronunciation. Grammar is also one of the most important components of language because speakers and writers communicate and convey their messages or ideas clearly and meaningfully because of their good grammar skills and understanding.

c. Fluency

Language skills are fluency related to the speed and ease used by a language learner in performing one of the four core language skills of speaking, listening, reading, and writing.

d. Vocabulary

Vocabulary is a basic aspect of language that must be mastered before mastering English skills because without vocabulary, sometimes it is not possible to clearly answer what the speaker is saying.

3. The Function of Speaking.

According to Richard (2008:21) speaking has three functions, namely:

1) Talking is an interaction.

Talking is called interaction because it refers to conversation and describes the process of interacting that serves a social or other function. For example, when they meet other people, they exchange greetings, talk lightly, and so on.

2) Talk is a transaction.

Talking is a transaction it refers to a situation where the focus is on what someone said to achieve a goal or be accomplished. In this function, the speaker must be able to convey the message accurately so that the listener clearly understands what is being conveyed, so that the transaction process can run well and smoothly.

3) Talk is a performance.

Talk is a performance, this is a public conversation that conveys information, such as class presentations, announcements, and speeches. The function of speaking is speaking as an interaction (social function), speaking as a transaction (to get something done), and speaking as a show (speaking in public).

4. Types of Talking in Class

Brown (2001) states that there are several categories of speaking, namely: imitative, intensive, responsive, transactional, interpersonal and extensive.

- a. Imitative performance is the performance of students imitating a sentence or word. Students try to determine certain vowels or study intonation contours. With the aim of imitation not for meaningful interaction but focus on certain elements or forms of language.
- b. Intensive is designed to train various phonological or grammatical aspects of language, intensive performance is to include each prescribed speech performance. Brown (2004:273) also states that intensive speaking relates to the production of short spoken language as a means of demonstrating competence such as grammatical, phrasal, lexical, or

phonological relationships (prosodic elements: intonation, stress, rhythm, point in time).

- c. Responsive is a short reply, which is an example of speaking that is displayed not extending into the dialogue of conversation, for example a normal or basic greeting, short or simple requests and comments, etc.
- d. Transactional is a form of language that is an extension of responsive language. Transactional purpose is to convey or share certain information. Transactional is an example of a conversation.
- e. Interpersonal or can be called (dialogue) tends to social relations better than exchanging information with each other. There are Several elements that may be involved in the dialogue such as ordinary registers, colloquial language, emotionally charged language, slang, ellipsis, sarcasm, etc.

- f. Extensive planned oral production. Extensive can be in the form of reports, summaries, and speeches.

5. Concept of Speaking Skill in General

Learning English is like if you don't practice or repeat it, there's no knowledge. English as part of communication, speaking more like representing what someone wants to say. By speaking, everyone can express what is in their mind, an idea, and those thoughts can be freely or spontaneously. For most people, mastering speaking skills is one of the most important aspects of learning a second or foreign language, and speaking success can be measured in terms of the ability to have conversations in the language itself.

“Speaking is a language art that is most often used by all humans around the world. The art of speaking is very complex. It requires the simultaneous use of a pool of abilities that often advance and develop at different rates. In general, there are five components of speaking

skills related to understanding, grammar, vocabulary, pronunciation, and fluency” (Syakur, 1987).

Speaking is a very productive skill and can be observed directly and empirically, so there are types of speaking assessments that can be used in assessing speaking skills. According to Brown (2003) he identified five types of judgment in speaking, the first is imitative speaking. This is the ability to speak to simply imitate (imitate) a word, phrase and a sentence. This is a purely phonetic level of spoken conversation, a number of prosodic, lexical and grammatical features of the language are included in the performance criteria.

Responsiveness includes all interactions and understanding on the test but in very short and concise conversations, standard greetings and small talk, few requests and corrections, and fabrics. Then talk interactively. There is a difference between responsive and interactive speaking, which is in the length and

complexity of the conversational interaction. Interaction can take two forms of transactional language. The last is extensive speaking (monologue). In charge of a wide range of oral productions such as speeches, class presentations, and storytelling, where opportunities for oral interaction from listeners are very limited.

In this study, researchers chose interactive speaking assessments in order to build good communication with students so that they are able to interact with other people in national and international competitions.

6. Indicators of Speaking Skill

According to Van Duzer, students' speaking skills and students' speaking habits are very important because they have an impact on students' success during any exchange. Students must be able to be speakers when they want to anticipate and then produce the expected patterns of certain discourse situations. Students must

also be able to master other elements such as repetition of words which requires them to have a large vocabulary because when they discuss they will provide feedback, turn, or diversion. Students must know the usual patterns that these interactions follow and access knowledge as the exchange takes place. Students must also be able to rearrange or emphasize words to clarify a description, and use facial expressions that match what is said.

7. The Techniques of Teaching Speaking.

According to Pollard (2008:34), there are several techniques to involve real communication as follows:

1) Information gap.

Each student in the group must have a lot of information because it is needed to complete the task or activity given by the teacher in class. This information gap aims to share information and complete their respective tasks.

2) Discussion.

The teacher tries to find a topic of conversation that will generate student opinions rather than making all students just say they agree. Examples include city life and rural life, environmental issues, traditional and alternative medicine.

3) Debate.

It uses a controversial topic because the speaker presents one point of view on the topic and the other speaker conveys a difference of opinion.

4) Spontaneous conversation.

This allows students to communicate about themselves that others may be interested in, for example, vacation stories, movies they watch. The teacher's role is to encourage, help with language or difficulties in their communication.

5) Role play.

Students are involved in taking roles and carrying out discussions with others who play their roles. The teacher explains and manages the situation when it takes place. The students prepare themselves and in groups, students who play the same role prepare together. Then, they formed a new group to have a discussion.

Based on the theory above, the researcher concludes that speaking skill is the ability to express something directly. Talking with the aim of sharing information such as sharing knowledge, telling stories, experiences, ideas, etc. Speaking must involve more than one or more people to make a communicative interaction, that is, there must be a speaker and a listener. Speakers who convey messages to listeners and vice versa listeners who respond because speaking skills are activities that not

only produce words or sounds, but also acquire meaning. Through working groups and then exchanging opinions. Then based on Florez's theory, students who experience speaking skills can be seen from several indicators:

1. Students do not have confidence in speaking.
2. Students interest in speaking is still lacking.
3. The average students still get a score below the KKM.
4. Strategy was used by teacher learning English is monotone.

B. Think Pair Share Strategy

1. The Nature of Think Pair Share Strategy

Think Pair Share is a cooperative learning strategy. According to Arends (2012:370) Think Pair Share Strategy was developed by Frank Lyman in 1985. Think-Pair-Share is an effective strategy to change the atmosphere in the learning environment in

the classroom. Strategy This provides time to think, respond, and exchange ideas. Therefore, Think-Pair-Share is a strategy whose teaching and learning process makes students more active and creatively active in the classroom.

Think Pair Share is a very simple but very useful strategy. Because of this strategy, the teacher gives a topic or question to students in class, then students are asked to think and answer questions from the teacher themselves, then students are made in groups or in pairs, then students discuss to find agreement on the answers among their groups. Finally, the teacher asks students to present the answers they discussed to all other students in the class. This strategy also provides opportunities for students to work alone or in collaboration with others. With this, students have many opportunities to be able to produce

good speaking skills, especially English speaking skills to share or exchange information in class.

According to Lie (2008:57) Think Pair Share is a type of strategy model created to provide opportunities for students to show their participation in other people in the class. With this Think Pair Share model, students have many opportunities to participate actively so that students gain a deeper understanding. Based on this opinion, the Think Pair Share (TPS) cooperative learning model makes the involvement of all students active in the learning process, it will have a positive impact on the development of students' speaking skills.

In addition, Think Pair Share is a strategy that was initiated to provide opportunities for students to think about certain topics and support students to formulate their ideas with other students. Students have the opportunity to convey ideas that arise in their minds

in response to questions given by the teacher in the teaching and learning process in class. Then students take turns in pairs and share with others.

Based on the description above, Think-Pair-Share refers to cooperative learning that makes students work in pairs or groups. Students have topic or problem ideas, or perhaps individual answers, they share ideas with partners. Therefore, they have the opportunity to present their ideas and share them with the whole class or in groups.

2. Steps of Think Pair Share Strategy

According to Yerigan (2008) as quoted in Azlina (2010), there are three stages of implementing the TPS strategy that are :

1) Think- Individually

All students think about the assignments given by the teacher. Then the teacher will give time to write down their own response ideas

before discussing them with their partner. Then, the response should be conveyed to the teacher before continuing to work with the partner.

2) Pair- with partner

Students need to form pairs. The teacher gestures for the students to share their responses with their partner. At this stage, each student discusses in pairs. From the results of the discussion, each pair will conclude and produce a final answer from their discussion.

3) Share- to the whole class

The teacher asks group pairs to share the results of the discussion or student responses with other class members. At the whole group discussion stage, each pair discusses in class to find similarities or differences in responses and then share opinions, namely by working together.

From the explanation above, it can be concluded that the teacher gives time for students to discuss a topic or a question. Second, students are divided into pairs and they have to share, discuss and express their opinions in pairs. Finally, student representatives share their ideas with the rest of the class or with other pairs.

3. Benefit of Think Pair Share Strategy

a. For students

According to Azlina (2010) TPS can increase students' self-confidence. Many students will feel more confident when discussing with their partner first before they have to speak in front of the class.

Second, the use of timers creates opportunities for students to discuss the ideas that are on their minds. In this construction stage, students know what they know and what they don't

know because it is very useful for students. Therefore, students are actively involved in the discussion. This occasion, students will think critically when discussing and reflecting on a topic. Students have many opportunities to exchange their thoughts with other students, so this will increase their involvement.

Last, Think Pair Share Strategy improves students' communication because they have time to discuss ideas. The responses received are therefore often more intellectually concise because students have the opportunity to reflect on their ideas.

From the statement above, it can be concluded that TPS strategy has many advantages. They connect from other students, increase students' confidence, provide opportunities to

share their thoughts, convey their critical thinking, and improve the quality of student response.

b. For teachers

Using the Think Pair Share technique, the teacher is able to build a pleasant classroom atmosphere. The teacher creates a new atmosphere to attract students to talk. Teachers can motivate students to dare to express their ideas or feelings and students are able to answer questions in class. By using this strategy the classroom atmosphere changes because students become active students during the learning process.

Second, the teacher can control the classroom atmosphere well. The classroom atmosphere is no longer centered on the teacher alone but on the students. Students are used as the center of the teaching process. The

classroom atmosphere is not only about spending time asking students to answer questions and asking them to share them in front of the class. Teachers are more creative in making new material to be discussed in the teaching and learning process.

4. The Weaknesses of Implementing Think Pair Share Strategy

Lie (2008) stated that there are several problems in working in pairs. First, with the large number of groups of teachers, they are required to always monitor students in class. Both groups consisted of two students so the students did not have good ideas. In addition, there will be boredom felt by students because they have to work together with team members who do not change. The solution to this problem, the teacher must replace members not other members by

dividing groups based on the number of students, the number of tables, or depending on the choice based on the wishes of the students. Then they can interact with other students in the class because they have changed groups. So that it can reduce the boredom of students in implementing this strategy.

With this it can be concluded that the use of TPS strategy is good for teaching English. However, there are only a few problems that may arise in using this strategy. Like the teacher it is difficult to help students during discussion activities because of the large number of groups. Teachers must pay attention to students when implementing strategies in order to reduce problems in the learning process.

C. Conceptual Framework

Based on observations and interviews at SMPN 11 South Bengkulu, the researcher found several problems in the speaking process. One of them is related to the condition of students who are embarrassed to express their opinions in English. They say them in a whisper. They don't trust themselves to express their opinion. They did not raise their hands and waited until the teacher called his name. In addition, they still lack vocabulary items. They find it difficult to convey their ideas. The activities are monotonous so most of the students listen and answer. As a result, they find the activity boring and not interesting at all.

Based on class problems, TPS will be applied as a technique in an effort to improve students' speaking skills. Think-Pair-Share is used because the teacher places students less often during training can be facilitated through working in pairs. Working together will have a positive impact on students' vocabulary, pronunciation and learning

materials self-esteem. They have the opportunity to practice speaking with their partner.

D. Previous study

The first study performed by Feni Cahyani (2018) entitled “The Use of Think-Pair-Share strategy to Improve Speaking Performance”. The researcher employed a quantitative method with experimental study of pretest and posttest control group design to investigate whether the use of TPS strategy can boost students’ speaking skill performance or not (Weda, et al., 2021). This research conducted in the third grade students of MTsN 2 Banda Aceh in which the number of the sample were 25 students from class IX-2 and IX-3. The study found that the score of students’ speaking performance increase after they learning trough TPS strategy. This finding can highly be recommended for teachers in teaching EFL class.

The second study conducted by Fitria Nurulaeni and Ch Ismaniat (2019) did research entitled Think-Pair-

Share Model: Improving Activeness and Communication Skills of Prospective Elementary School Teachers. The researchers implemented think-pair strategy with action plan used a qualitative approach to find out the improvement communication skill of students. The sample of this study were 43 students of elementary teacher education (ETE) program at one university in Yogyakarta. As it enhanced student behavior and communication skills, implementing the think-pair-share model in the basic science concept subject was successful. The findings indicate that an increased percentage of each sign was present.

The third Annisaa Eka Warliati developed the following study on TPS strategy, Zainal Rafli and Darmahusni entitled “Discussion and Think Pair Share Strategies on Enhancement of EFL Students’ Speaking Skill: Does Critical Thinking Matter?” This study aims to investigate the strategies of learning such as Discussion

Strategy and Think-PairShare Strategy/TPS, which are mediated by critical thinking on the speaking skill. The sample of this research were 60 students of the Department of English Education at a private university in Cirebon. This study implemented an experimental research design with a 2X2 factorial design. The study showed four major findings. First, the scores of discussion strategy was higher than those of think pair share on improving students' English speaking skill. Second, the scores of high critical thinking level was higher than those of low critical thinking. Third, learning strategy and critical thinking toward English speaking skill related each other. Fourth, there was no improvement in students' speaking skills using strategy and Think Pair-Share strategies in the low critical thinking level group.

CHAPTER III

RESEARCH METHOD

A. Research Design

This research employed classroom action research. Arikunto, Suhardjono, and Supardi (2015:1) explain that classroom action research (ECAR) is research that describes what events occur when treatment is given, classroom action research also shows the process from beginning to end whether it has an effect or not. It can be said that Ecar is a type of research that shows the process and results to improve the quality of teaching and learning.

The researcher will conduct the students of class IX A at SMPN 11 South Bengkulu. The researcher took one of the classes whose students' speaking ability still had the lowest average score. The researcher asked the English teacher in the class, he said that based on his experience during the teaching and learning process of speaking skills,

the researcher found problems from the teacher such as the inability of students to speak, especially English. The researcher choice the Think Pair Share strategy as a solution to fix problems in class.

Classroom action research has the following principles: (1) educators and education staff have the main task of creating or organizing a good and quality learning process in the classroom; (2) research is an integral part of the teaching and learning process, which does not require specific time or data collection methods; (3) the research process is an integral part of learning so it must be carried out by sticking to certain scientific lines and rules; (4) problems that exist or are experienced are real learning problems and involve professional responsibility and commitment to diagnosing problems rather than real events that occur in the context of learning that is not wrong; (5) being consistent and caring to try to improve the quality of learning is very much needed in schools; (6) classroom

action research has a scope that should be limited to learning problems in the classroom, but can be extended to levels outside the classroom, for example system or institutional level.

Based on the experts above, it is concluded that classroom action research is a research that has a reflective nature by carrying out certain actions to make improvements in an effort to improve the quality of learning practices in the classroom so that students can get better learning outcomes than before. Further explanation that Classroom Action Research includes four stages, namely planning, implementation, observation, and reflection.

This research was conducted with the reason to be able to see the improvement of speaking skills including the process and learning outcomes by applying the Think-Pair-Share strategy. In the results of the initial observations made by researchers in September, researchers found that

speaking skills had never been done using the Think Pair Share strategy.

B. Research Setting

The object of Classroom Action research was the students of class IX A of SMPN 11 South Bengkulu. The researcher chooses the class because most of the students have low on speaking skill.

C. Research Method

In this research, the researcher uses classroom action research. Encouraging students to participate actively in the process of learning activities in class in order to improve the process of speaking skills using Think Pair Share Strategy. Action research is a systematic process for solving problems in an educational institution or school and make repairs. Classroom Action Research is a broad movement research that has been going on in general education for some time. This is related to the

reflective notion of practice and the teacher as a researcher. This means that action research is a handy way of looking at an exercise to check if it's the way you feel it should be.

Action research is carried out by one or more individuals or groups to the purpose of solving a problem or obtaining information to inform practice. Those involved in action research generally want to solve several types of day-to-day issues, such as performances to reduce absenteeism or incidents of vandalism among students, motivating student apathy, looking for ways to use technology to improve English teaching, or increase funding.

In addition, Yogesh Kumar (2016:48) state that action research is a method to improve and modify the classroom work system in schools. From the explanation above, it can be concluded that the class action research is research in the teaching and learning process in the

classroom which aims to solve a problem or fix something. The main objective of Action Research is to identify 'problematic' situations or problems that are participants which may include teachers, students, managers, administrators, or even parents consider taking a deeper and systematic look.

The purpose of this research is to find a solution to the problem. In this research the researcher needs collaborators to help him in this action research because it is still a new writer. Arikunto (2010) defines collaborative research as research conducted together by helping friends. The author asked the English teacher in the tenth class, she is Mrs. Herni S.Pd as a research collaborator in conducting research.

1. Cycle I

1) Planning

Planning stage the researcher must put together all the wishes in speaking capabilities from

the beginning of the have a look at to the end, in order that the results of this examine may be according with what the researchers assume. The planning steps encompass: (1) preparing a lesson plan (RPP) related to speaking skills and making use of think Pair share techniques, (2) researchers getting ready gaining knowledge of materials, (3) researchers growing test and non-test devices (remark publications, interviews). manuals, and documentation). and (four) researchers collaborate with class k instructors while getting to know might be executed in class.

2) Implementation

The actions taken should be according with what has been planned from the start of the research. The moves taken in trendy are carrying out talking abilities getting to know activities the usage of the assume Pair share strategy. This level

has 3 stages, specifically apperception, studying technique, and assessment. The apperception level is the adjustment level for college students in order that they may be prepared to follow the learning method. This stage is inside the shape of the trainer greeting students when beginning mastering activities, the instructor asking the pupil's circumstance, and the teacher frightening students to bring the obstacles experienced for the duration of the talking learning method.

a. Think- Individually

At this stage, each student is given time to think about the assigned task. Students also express their own ideas or responses before discussing these responses with their partners.

b. Pair- with a partner

Students are formed in pairs. The teacher just gestures for the students to share

their responses with their partner. At this stage, each pair discusses ideas for assignments given by the teacher. At the end of the discussion, each group concludes and gets the final answers for their assignments.

c. Distribute-to the whole class.

At this stage the teacher questions group pairs to share the results of the discussion, in the learning team with all students in the class. After that there was a big discussion where each pair discussed the results of their discussion in front of the class to find similarities or differences in responses or opinions from various other pairs.

3) Observation

The observation phase carried out is observations made during the learning process carried out at school. This stage reveals events

related to teaching and learning activities in the classroom, both student activities during learning activities and student responses to learning strategies. Data development was carried out by means of tests and non-tests. In the observation process, data were obtained in several ways, namely (1) conducting written tests on students to determine students' speaking skills and improvement after two cycles, (2) student observations to determine student behavior or activities during learning activities, (3) photos to very important documentation as a report in the description of student activities during learning.

4) Reflection

Reflection is the stage where the researcher sees the results of the actions and observations made. If there are unsatisfactory results, as a material for improvement in cycle II. There are

several evaluation results that can be used as reflections, namely (1) are there advantages and disadvantages of the think pair share strategy used by teachers during the teaching and learning process, (2) the results of researcher observations in cycle I, (3) actions taken by students, and (4) the actions taken by students are examined by researchers during the learning process. Then the results of this reflection can be compiled as a learning implementation plan for cycle II. Problems in cycle I that arise can be found a way out in cycle II, if for example there is an excess it will be maintained.

2. Cycle II

The second cycle process is a continuation stage the first cycle, the process is the same as the first cycle, but the second cycle is an improvements stage in first cycle learning process which is not perfect. In the

first cycle, there was no clear data on improving speaking skills using the TPS strategy, so that in the first cycle the students' speaking ability could not be said to have increased. The improvement of the teaching and learning process in cycle II was found in the preparation during the learning process, the learning atmosphere to be more comfortable and concentrated. The steps in cycle II are:

- 1) Planning

The planning stage on this 2d cycle, gaining knowledge of has been improved and delicate. The deficiencies that befell in the first cycle might be corrected. The teacher prepares test and non-test questions in cycle II, and the researcher coordinates with the difficulty teachers in magnificence.

2) Implementation

Second cycle, the movements taken had been upgrades inside the first cycle by means of correcting mistakes and completing present deficiencies. The motion in cycle II isn't the same as cycle I, particularly before students start speaking, the instructor explains first the errors that arise in cycle I, then college students are given directions in order that speakme activities in cycle II become better.

b. Observatiomn

Commentary student observatioons have been executed at some stage in the studying process, in cycle II there increase in student behavior test effects. student behavior is observed starting from the activity of college students carrying out assignments, the way college students convey the outcomes in their assignments and the

manner students reply to what is said by the teacher.

c. Reflection

At this mirrored image degree, it's miles received by paying interest to test results and non-check outcomes which include pupil observations, interviews, and photo documentation. in the second cycle, mirrored image makes conclusions and unearths out the effectiveness of using the TPS strategy in speaking and sees the development of students' speaking talents, in addition to to find out modifications in student conduct after taking part in learning.

D. Data and Data Sources

1. Data

The data for this class action research are the truth and numerical results about improving speaking skills

using the think pair share strategy in class IX A students of SMPN 11 Bengkulu Selatan.

2. Data Sources

- a. Resource persons are teachers and students of class IX A SMPN 11 South Bengkulu
- b. The research place for the teaching and learning process of English is held in the classroom when there is a learning process where the think pair share strategy is used. The archives and the documents needed are the attendance of students, teachers, a list of English grades for grade IX A students of SMPN 11 Bengkulu Selatan, K13 and all things that support the implementation of the research.

E. The Technique of Data Collections

The data obtained are using qualitative and quantitative data, while the data collection technique used in this research is to do tests and non-tests to measure or

get the results of improving speaking skills with the think-pair-share strategy.

1. Technical Test

Data collection in the study was obtained by using a test. The test was conducted twice, in cycle I and cycle II. The test material refers to every aspect of speaking assessment. The researcher made each student by speaking English. Furthermore, there will be an evaluation of the process of learning to speak English using a question and answer test in class. In the first cycle the test results will be analyzed so that they can see and find out the weaknesses of speaking to students, then become a reference for solving them in the second cycle. In cycle II, the results were analyzed in order to find out the improvement in speaking skills using the think pair share strategy. Student tests are assessed by following Harris's (1969) theory as follows:

Table 3.1
Speaking Measurement

Component Speaking Measurement	Points	Behavioral Statements
Pronunciations	5	At least have a foreign accent even if a little
	4	although one is aware of a definite accent, but always understandable.
	3	Pronunciation requires a concentrated listener because it sometimes causes misunderstandings during interactions.
	2	The pronunciation problem is very difficult to understand. So it must be repeated.
	1	Pronunciation becomes a

		problem severe when speech is almost incomprehensible.
Grammar	5	Make visible structural or grammatical or word order errors (if any).
	4	Making grammatical errors and wrong word order will obscure meaning..
	3	Makes grammatical and word order errors that sometimes obscure meaning constantly.
	2	Errors in the grammatical arrangement and the order in each word will make understanding more difficult. Therefore, they must often rearrange sentences or by limiting themselves to basic patterns.

	1	Errors in every grammar and idiom can hardly be understood clearly.
Vocabulary	5	Use of vocabulary and idioms is virtually that of native speaker.
	4	Sometimes uses un appropriate terms and/or rephrase ideas because of lexical inadequancies.
	3	requently uses the wrong words, conversation somewhat limited because of inadequate vocabulary.
	2	Misuse of words and very limited vocabulary make comprehension quite difficult.
	1	Vocabulary limitations so extreme as to make conversation virtually impossible.

Fluency	5	Speech as fluent and effortless as that of a native speaker.
	4	Speed of speech seems to be slightly affected by language problems.
	3	Speed and fluency are rather strongly affected by language problems
	2	Usually hesitant, often forced into silence by language limitations
	1	Speech is as halting and fragmentary as to make conversation virtually impossible
	5	Appears to understand everything without difficulty.
	4	Understands nearly everything at normal speed, although occasional repetition may be

Comprehension		necessary.
	3	Understands most of what is said at slower than normal speed with repetitions. Has great difficulty following what is said
	2	Can comprehend only “social conversation” spoken slowly and with frequent repetition
	1	Cannot be said to understand even simple conversation English

Table 3.2

Guidelines for Assessment of Speaking Skills

No	Score Interval	Category
1	85-100	Very Good
2	75-84	Good
3	65-74	Enough
4	0-64	Minus

From the table above, it can be seen that students will get the highest score, namely from the five aspects of the assessment that have been determined if students get the maximum score. Therefore, when students will get the maximum score if the student has got a total score of 100 from the five aspects obtained. Final grades on students can be obtained using the following formula:

The maximum score was 25 :

$$\text{Score} : \frac{\text{the result of the score}}{\text{maximum score}} \times 100$$

2. Technical Nontest

a. Observations

"Observation is an observing activity centered on objects by using equipment or human needs to see results". Arikunto's statement (2006:156) So, in this class research observation, the research used is a systematic observation research. The object of observation is to see the activities of students in learning English in class. This observation was carried out by research in order to be able

to see and find out how the condition of the class and students participating in the teaching and learning process, student motivation, difficulties or students' problems when speaking English. This study uses a checklist observation to be more systematic, containing a list of all student activities and responses or events that may occur during learning.

2. Documentation

Documentation in research is guided and aims to obtain non-test data in the form of images when the learning process takes place in each cycle. The purpose of this is to prove that research on the use of think pair share strategies to improve students' speaking skills was actually carried out by researchers in class IX A of SMPN 11 South Bengkulu.

CHAPTER IV

DATA ANALYSIS AND DISCUSSION

A. Data Analysis

Data collection was carried out by observation researchers in the classroom. Then the researcher discusses or consults with the teacher about what things they should do during the research. This research focuses on each action carried out in two cycles. The class chosen was class IX A of SMPN 11 Bengkulu Selatan which consisted of 30 students.

B. Report of Cycle I

Researchers are teachers who try to improve students' speaking skills by using or through think pair share strategies. The think pair share strategy will be successful in improving students' English speaking skills. The details of cycle I are as follows:

1. Planning

Researchers make lesson plans, prepare materials to be used or related to oral tests, namely pronunciation, grammar, fluency, word understanding, understanding, and topics they will discuss in class. All materials or tools used by researchers to teach students in class so that the learning process takes place smoothly.

2. Acting

This stage includes three stages: apperception, learning process, and evaluation. At the apperception stage, the teacher and researcher open the class by greeting students and linking the learning activity material to be carried out with the experience of students with previous material or activities, the teacher also provides an overview of the benefits of studying the lessons to be studied, if this material or theme is done well and earnestly and mastered well, students are expected to be able to explain about the

material being studied. Then as a reference the teacher informs the material to be discussed at that time, informs about core competencies, basic competencies, indicators, and KKM at the meeting that takes place, divides study groups, explains the mechanism for implementing the learning experience according to the learning steps.

At the learning stage the process are:

- 1) Think-Individually: Each student thinks about the assigned task. They will be given time to express their own ideas or responses before discussing them with their partner. Then, the response should be conveyed to the teacher before continuing to work with the partner.
- 2) Pair-with partners: Students need to form pairs. Researchers need to cue students to share their responses with their partners. At this stage, each pair of students discuss their ideas about the task.

From the results of the discussion, each pair concludes and produces their final answer.

- 3) Distribute to the whole class: The researcher asks pairs to share the results of the discussion or student responses, in the study team, with the whole class, or with the whole class during the follow-up discussion. In the large discussion stage, each pair facilitates class discussions so that they can find similarities or differences in the responses and opinions of various pairs of each.

Table 4.2

The Scoree of Students Speaking Test Cycle I

No	Subject	Score per Aspect					score
		Pronou ciation	Grammar	Vocabulary	Fluency	Compr ehensio n	
1	AM	20	20	15	10	10	75
2	AN	20	20	15	10	10	75
3	AS	15	15	15	10	10	65

28	RI	20	15	10	10	10	65
29	SMA	20	20	15	10	10	75
30	SR	15	20	10	10	10	65
Total		595	530	410	300	300	2135
Mean		19,83	17,67	13,67	10	10	71,17
Complete		16			53,33%		
Not Complete		14			71,17%		

Table 4.2
Percentage of Students Speaking Cycle I

No	Category	Score interval	Frequency	Percentage	Information
1	Very Good	80-100			
2	Good	75-84	16	55,33%	Tuntas
3	Enough	64-75	11	36,66%	Tidak Tuntas
4	Minus	0-60	3	10%	Tidak Tuntas
Total			30	100%	
Level of complete : $16 : 30 \times 100 = 53,33\%$					
Incomplete percentage : $14 : 30 \times 100 = 46,67\%$					

The speaking skills of class IX students were obtained by 16 students who were declared complete and 14 students who were declared incomplete based on the results of the first cycle. The results of the research stated that the students' speaking ability was still unsatisfactory because it did not meet the standard of success with completeness. Minimum score was 75 and the criteria for completeness were at least 75% of the total number of students. Based on the analysis above, researchers and English teachers really need action in the form of improvement so that the learning process by

setting the appropriate steps to improve students' speaking skills by doing the second cycle.

3. Observing

Researchers conducted observations of students and class teachers. Observations were made when the learning process started until it ended. In this observation, it will be seen events related to learning as a whole, both student activities during learning activities and student responses to the learning method taking place. During this observation, the data was obtained in several ways, namely (1) a written test that aims to determine the improvement and speaking skills of students after two cycles, (2) student observations, namely to find out and see all student behaviors and activities during learning activities, (3) photo documentation which is very important as a report in the ongoing learning. in the form of a description of student activities during learning.

Table 4.3**Student Observations Sheets Cycle I**

No	Information	Number of Active Student	Percentage
1	Readiness of students in participating in learning	$\frac{14}{30} \times 100$	46,66%
2	Student activity in asking and answering questions.	$\frac{3}{30} \times 100$	10%
3	Students' seriousness in listening to the teacher explanation	$\frac{11}{30} \times 100$	36,66%
4	Orderly in learning	$\frac{13}{30} \times 100$	43,33%
5	Students' seriousness in participating in learning	$\frac{17}{30} \times 100$	56,66%

Table 4.4**Teacher Observation Cycle I**

Category		Good			

Assesment Criteria :

VG : Very Good (4)

E : Enough (2)

G : Good (3)

M : Minus (1)

4. Reflecting

In this reflection stage, the researcher saw the results of the action and observation stages in the classroom. The negative results can be used as material for improvement in the second cycle. Evaluation results that can be used as reflections are (1) disclosure of the advantages and disadvantages of each model used by teachers in the learning process, (2) disclosure of observations made by researchers, (3) disclosure of actions taken by students, and (4) disclosure of actions taken by researchers during the learning process. The results of the reflection can be arranged learning

implementation plans for the second cycle. Problems that arise in the first cycle will be found conclusions or solutions in the second cycle, whereas if there are advantages it will be maintained and improved continuously.

C. Report of Cycle II

In stage II the process is the same as in cycle I, but this second cycle is an improvement stage during the first cycle of learning process. Cycle I did not get clear data on improving speaking skills using the think-pair-share strategy to students, so that in cycle I, students' speaking ability could not be called increased, because the first cycle of research had not been carried out. So that in the first cycle there is no conclusion or conclusion. The improvement of the second cycle learning process lies in the preparation of the learning process, conditioning the learning atmosphere to make it calmer and more

concentrated. The steps in cycle II are planning, action, observation, and reflection.

1. Planning

In the planning stage in the second cycle, learning has been improved and refined in such a way that at this stage the shortcomings contained in the first cycle can be corrected. The teacher also prepares test and non-test questions for cycle II and coordinates again with the subject teacher.

2. Acting

At the planning stage of the second cycle, learning has been improved and refined. At this stage the shortcomings that occur in the cycle will be corrected by the researcher.

Table 4.5**The Score of Students Speaking Test Cycle II**

Mean		23	18	16,5	10	10	77,5
Complete		30			100%		
Not Complete		0			0		

The table above can be concluded and it can be explained that the average score of students' speaking ability in

class IX is 77.5. With this, it is certain that the score shows an increase compared to the first cycle, which is 71.17. Based on the average value seen and obtained from the research in the first cycle is 71.17 and the level of completeness is only 53.33% of students who achieve completeness. After the second cycle was carried out, there was an increase with an average of 77.5 and a 100% completeness level of students because it used the think pair share strategy. It will become clearer in the table below.

Table 4.6

Percentage of Students Speaking Cycle II

No	Category	Score interval	Frequency	Percentage	Information
1	Very Good	85-100	4		
2	Good	75-84	26		
3	Enough	65-75			
4	Minus	0-64			
Total		30		100%	
Level of complete : $30 : 30 \times 100 = 100\%$					
Incomplete percentage : -					

Based on the results of research conducted in cycle II, the speaking ability of class IX A students increased by having a total of 30 students, the assessment of the data results also

stated that students' speaking abilities were successful and satisfactory because they had exceeded classical mastery. With an average value of English subjects that is 75% and a Minimum Completeness Standard value of 75.

1. Observing

Observations continued for the last time in the second cycle. Student activity was observed and it was shown that most of the students had no more problems in speaking. They really like the discussion and topics given by the teacher while studying. Students are already active during the teaching and learning process and are more enthusiastic than before.

Table 4.7

Students Observation Sheets Cycle II

No	Information	Number of Active Student	Percentage

1. Reflecting

Reflection results are obtained by paying attention to test and non-test results which include student observations, and photo documentation in class during the learning process. In cycle II, reflection aims to make or draw conclusions and find out the effectiveness of students when using think-pair-share strategies in their speaking and see an increase in speaking skills, and find out changes in student behavior after following the lesson.

D. Improved Students Speaking Skill of Cycle I and Cycle II

The teaching and learning process in this study which has been carried out by researchers using the think pair share cooperative strategy to improve speaking skills in class IX A students of SMPN 11 Bengkulu Selatan has obtained research results which state that students' speaking skills using this think pair share strategy can

increase. The results can be seen from the results of the assessment tests given to students to be carried out at any time in the stages of learning activities carried out by researchers, namely cycle I and cycle II. Tables and diagrams are very visible that students' learning skills from cycle I to cycle II.

Figure 4.1

Diagram Improved Students Speaking skill Cycle I and Cycle

II

Based on the description above, the teacher and researcher concluded that the learning process in implementing the Think Pair Share strategy in class IX A to improve speaking skills had been running smoothly and well. It can be seen from the results of the research results in cycle I and cycle II that it increases according to the Minimum Completeness standard of 75 and the percentage of classical completeness of students is 75%. With this, it can be

concluded that the use of the Think Pair Share cooperative strategy can improve the speaking skills of class IX students of SMPN 11 Bengkulu Selatan.

E. Discussion

The researcher elaborated the results and the research process in this section. The purpose of this study was to determine whether there was a significant effect and a significant difference on the speaking ability of students who were taught using the think pair-share strategy and who did not. Based on the explanation in the previous data analysis, the results show that there is a significant and significant difference in students' speaking ability after being taught using the think-pairshare strategy. This can be proven by the results of cycle I and cycle II. However, before the researcher presents the results of his research, the process will be discussed first in this section.

In conducting the research, the researcher conducted cycle I and cycle II. In cycles I and II, class IX A

of SMPN 11 South Bengkulu did well on the test. There were 30 students in cycle I. The students were asked to write a text on the topic provided by the researcher. Then, they were given 7 minutes to prepare their descriptions before presenting them in front of the class. In preparing their descriptions, students apply the think-pair-share strategy. The steps are they think about the theme for a while, get pairs (pairs) to share their ideas about the theme, and finally, they share their answers to all students about the theme orally and individually in a short monologue. Think-Pair-Share is an effective way to make students more confident and reduce their nervousness to speak in front of the class. According to Arends as quoted in Hidayana (2017, p.47), there are three steps in doing Think-Pair Share, namely thinking alone about the answers, in pairs to discuss what they think. they have thought about, and share what they have talked about with the whole class.

Furthermore, through Think-Pair-Share, students' speaking ability increased after being given treatment in the application of Think-PairShare for 2 times, the average value of students from cycle I and cycle II increased as evidenced in the final count, namely in cycle I the average value of students 71.17 with a maximum benchmark of 75 there were 16 students who were declared complete and 14 students not complete. After doing the first cycle, the researcher did the second cycle, it was proven that the average score of students had increased, namely 77.5 with 30 students having reached the maximum value benchmark.

In addition, from the calculation of the percentage test, it was found that the calculation results revealed that in the first cycle there were no students who got a score of 80-100, 16 students who got a score of 75-84 with a percentage of 55.33% had been declared complete, then students who got a score of 64-75 as many as 11 people with a percentage of 36.66% have not been declared complete and students

who get a score of 0-65 as many as 3 people with a percentage of 10% are declared incomplete. While in cycle II, the percentage of students increased greatly, as seen from the calculation of students who got a score of 85-100 already as many as 4 people and a score of 75-84 already 26 people have been declared complete from the maximum score of 75 and those who get a minus score are no longer there.

Therefore, the researcher concludes that there was a significant improvement on students' speaking ability after they learn English by using Think Pair Share strategy. The result was not only given positive effect in present research but also in previous research. It was proved by Rika (2017) in her research which states that the TPS strategy motivates students to carry out speaking activities in class. This strategy gives students an opportunity to practice the target language. Then, he also added that TPS made students more active in working together and made them more confident in class. Awad (2017) in his research also argues that the TPS

strategy can improve students' speaking skills because it allows students to present in front of the class and share their ideas with their friends. TPS is a cooperative learning strategy. It was developed by Frank Lyman in 1985. TPS strategy is used to train students' cooperation in doing something. Isjoni (2012) states that TPS is a very useful strategy. He gave students to think about the answers to the teacher's questions and paired up for other students and then presented in front of the class.

Another factor that supports the smooth running of this research is that students are very enthusiastic during the cycle teaching and learning process, initially when using Think Pair Share in class, students are still adapting to this strategy but over time with this strategy students become bolder and motivated to speak because of this strategy. make students have to think before expressing opinions about the material given. In addition, the teacher becomes more enthusiastic about teaching using this strategy because

student learning outcomes increase and the teaching teacher is very easy to understand by students, they are willing to continue learning with fun learning materials.

In Cycle I, the students' speaking skills were still in the poor category. This is indicated by several indicators of speaking skills, namely pronunciation, grammar, vocabulary, fluency, understanding, which have not shown good results. Of these indicators, only one received a sufficient predicate, namely the pronunciation indicator and the rest received a poor predicate. When speaking in class, students show a fairly calm attitude, but students have not been able to master the concepts in learning. When speaking in front of the class, students' voices cannot be heard by all students. At the time of speaking the students could not convey it fluently, and when the students spoke there was also a lot of repetition of words. When expressing opinions, students do not stutter and their voices can be heard by all students in the class. While the indicators of word choice,

attitude and mastery of the topic get a sufficient predicate. In expressing opinions, students are able to choose words that are effective and not monotonous, students also look quite calm, and students are gradually able to master the material even though they still carry small notes. In the second cycle, students' speaking skills experienced improvement in overall topic mastery indicators. When speaking in class, students have mastered the material to be delivered. Student voices have also been able to be heard by all students in the class and students convey his opinion smoothly.

The application of the think pair share type of cooperative model by researchers to improve speaking skills has not been fully implemented well. There are some obstacles during the action. These obstacles are caused by both teachers and students. Especially in the initial cycle where teachers and students are not familiar with the implementation of the Think Pair Share Strategy. However, these obstacles can be overcome by the teacher through

reflection activities carried out by the teacher and the researcher.

In conclusion, there is a significant and significant difference in the speaking ability of students who are taught using the think-pair-share strategy and those who are not. Based on actions, observations, and reflections, the researchers found several suggestions and recommendations in using the think pair share strategy, namely as follows.

First, TPS is able to grow students' self-confidence. Previously, they were shy to express their opinion. Students lack confidence to appear speaking in front of the class. During the TPS, they had many opportunities to interact with their partners and groups. This interaction encourages them to speak more English, but they need not feel embarrassed because all the students are also practicing.

Second, TPS is able to give students more opportunities to express their thoughts. The teaching and learning process approach is no longer teacher-centered. The

students can explore their speaking ability in English. Therefore, they can improve their speaking ability because language is a matter of habit.

Third, TPS is able to improve students' speaking skills in several aspects such as fluency, vocabulary, pronunciation, and intonation. By using this technique, students have more opportunities to be able to speak in English because they have a partner to share ideas and provide feedback.

Last, TPS is able to increase students' motivation in speaking. Students are motivated to show their improvement in speaking because the class situation is active and fun. In addition, to increase student motivation, teachers need to take other actions to increase student motivation by giving rewards to active students. By giving rewards, teachers can attract students' attention.

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

Based on the results of research that has been carried out by researchers in these two cycles, it has succeeded in improving students' pronunciation, intonation and stress, understanding, mastery of grammar, vocabulary and students' self-confidence. This can be seen from the average cycle II which is higher than the average cycle I of 77.5.

Constraints faced by teachers when applying the learning model First, the model used by the teacher still feels foreign to students so that students need time to adjust to the model used. Second, the lack of closeness between teachers and students causes the class atmosphere to become stiff and tense when applying the Think Pair Share type of cooperative learning model. Third, the teacher is not able to condition students, so that

when students speak in front of the class there are still other students who chat and do not listen. Fourth, in the first cycle the teacher was less able to motivate students so that when the teacher asked students to speak in front of the class, only a few students were willing.

The efforts made by the teacher to overcome these obstacles are: first, the teacher must introduce the Think Pair and Share cooperative learning model to students. Second, the teacher must approach students so that learning is fun and students do not feel tense. Third, the teacher must be able to condition students and divide attention to all students so that no more students are chatting and not listening when other students speak in front of the class. Fourth, the teacher must be able to motivate students so that students are willing to speak in front of the class without feeling afraid, doubtful, and tense.

Students' speaking skills when applied to the Think Pair and Share cooperative learning model experienced changes and improvements in each cycle. This increase can be seen based on the results of observations. In the first cycle the acquisition of students' speaking skills was in the poor category because students were still not able to look tense and had not been able to master the material well when speaking in front of the class, students' speaking skills were in the sufficient category. The increase occurred in cycle II, in cycle II students' speaking skills were in the good category, students were able to master the material well and students also wanted to speak in front of the class. Based on these results, it can be concluded that the application of the Think Pair and Share cooperative learning model can improve students' speaking skills in learning.

B. Suggestions

Based on the results of the research that has been carried out there are several suggestions given to participants that are closely related to this research, namely:

1. For English subject teachers

English teachers should be able to consider what students' needs and interests are before designing speaking learning materials. It is very important for every teacher to use various techniques or strategies according to what is needed by students because it can reduce boredom and monotony of students during learning. It is very useful for them to use the TPS strategy as one of the right strategies in teaching students' speaking.

2. For Students

By using the Think-Pair-Share strategy, students have many opportunities to share the ideas that are in their

minds. It also increases the ability and motivation of students to be more enthusiastic about learning.

3. For Other Researchers

The weakness of the research is the lack or it can be called the limited time in the implementation of the research action. Other researchers who are interested and have an interest in the same field are advised to apply learning actions in a longer period of time to get maximum results so that improvements will be seen significantly.

		4.10.2	Mempresentasikan hasil diskusi ke depan kelas

C. TUJUAN PEMBELAJARAN

Setelah melakukan serangkaian kegiatan pembelajaran melalui Pembelajaran peserta didik diharapkan mampu :

- Mengidentifikasi fungsi sosial, structure tesk dan unsur kebahasaan pada teks berupa iklan yang mempromosikan barang dan jasa.
- Merespon makna dalam teks , lisan dan tulis, sederhana, tentang Mempromosikan barang dan jasa.
- Menyusun teks lisan dan tulis sederhana tentang mempromosikan barang dan jasa.

D. MATERI PEMBELAJARAN

- Fungsi sosial mempromosikan barang dan jasa
- Struktur teks dapat mencakup :
 - Visual
 - Logo
 - Headline
 - Sub-headline
 - Body copy
- Unsur kebahasaan
 - Ungkapan dan kata sesuai dengan kekhasan setiap iklan
 - Ucapan, tekanan kata, intonasi, ejaan, tanda baca dan tulis tangan
- Topik
 - Produk dan jasa terkait dengan kehidupan peserta didik SMP yang dapat menumbuhkan perilaku yang termuat di KI

E. METODE PEMBELAJARAN

- Think Pair Share Strategy
- Model cooperative learning

Penutup	<ul style="list-style-type: none"> ➢ Guru dan peserta didik secara berpasamaan membuat ringkasan bahan yang sudah dipelajari pada pertemuan ini. ➢ Guru mengajukan pertanyaan kepada peserta didik untuk membantu mereka melakukan refleksi terhadap kegiatan belajar yang telah mereka lakukan. ➢ Guru mengingatkan peserta didik untuk mempelajari kembali materi hari ini di rumah. ➢ Guru menjelaskan rencana kegiatan pembelajaran yang akan datang. 	15 Menit

I. PENILAIAN HASIL PEMBELAJARAN

Speaking Measurement

Component Speaking Measurement	Points	Behavioral Statements
Pronunciation	5	At least have a foreign accent even if a little
	4	although one is aware of a definite accent, but always understandable.
	3	Pronunciation requires a concentrated listener because it sometimes causes misunderstandings during interactions.
	2	The pronunciation problem is very difficult to understand. So it must be repeated
	1	Pronunciation becomes a problem severe when speech is almost incomprehensible.
Grammar	5	Make visible structural or grammatical or word order errors (if any).
	4	Making grammatical errors and wrong word order will obscure meaning.
	3	Makes grammatical and word order errors that sometimes obscure meaning constantly.
	2	Errors in the grammatical arrangement and the order in each word will make understanding more difficult. Therefore, they must often rearrange sentences or by limiting themselves to basic patterns.
	1	Errors in every grammar and idiom can hardly be understood clearly.
Vocabulary	5	Use of vocabulary and idioms is virtually that of native speaker
	4	Sometimes uses un appropriate terms and/or rephrase ideas because of lexical inadequacies
	3	requently uses the wrong words, conversation somewhat limited because of inadequate vocabulary.
	2	Misuse of words and very limited vocabulary make comprehension quite difficult
	1	Vocabulary limitations so extreme as to make conversation virtually impossible.
Fluency	5	Speech as fluent and effortless as that of a native speaker
	4	Speed of speech seems to be slightly affected by language problems.
	3	Speed and fluency are rather strongly affected by language problems
	2	Usually hesitant, often forced into silence by language limitations
	1	Speech is as halting and fragmentary as to make conversation virtually impossible
Comprehension	5	Appears to understand everything without difficulty.
	4	Understands nearly everything at normal speed, although occasional repetition may be necessary.
	3	Understands most of what is said at slower than

		normal speed with repetitions. Has great difficulty following what is said
	2	Can comprehend only "social conversation" spoken slowly and with frequent repetition
	1	Cannot be said to understand even simple conversation English

Guideliness for Assessment of Speaking Skills

No	Score Interval	Category
1	85-100	Very Good
2	75-84	Good
3	65-74	Enough
4	64-0	Minus

The maximum score was 25 :

$$\text{Score} = \frac{\text{the result of the score}}{\text{maximum score}} \times 100$$

RENCANA PELAKSANAAN PEMBELAJARAN

Nama Sekolah : SMPN 11 Bengkulu Selatan
Mata Pelajaran : Bahasa Inggris
Kelas/semester : IX/A/2
Chapter IX : You Can Always Come Back Home
Materi Pokok : 93 Million Miles
Alokasi Waktu : 2 Pertemuan 2x45 Menit

A. KOMPETENSI INTI

- KI-1 Menghargai dan menghayati ajaran agama yang dianutnya.
- KI-2 Menghargai dan menghayati perilaku jujur, disiplin, santun, percaya diri, peduli dan bertanggung jawab dalam berinteraksi secara efektif sesuai dengan perkembangan anak di lingkungan, keluarga, sekolah, masyarakat dan lingkungan alam sekitar, bangsa, negara, dan kawasan regional.
- KI-3 Memahami dan menerapkan pengetahuan faktual, konseptual, prosedural, dan metakognitif pada tingkat teknis dan spesifik sederhana berdasarkan rasa ingin tahunya tentang ilmu pengetahuan, teknologi, seni, budaya dengan wawasan kemanusiaan, kebangsaan, dan kenegaraan terkait fenomena dan kejadian tampak mata.
- KI-4 Menunjukkan keterampilan menalar, mengolah, dan menyaji secara kreatif, produktif, kritis, mandiri, kolaboratif, dan komunikatif dalam ranah konkret dan ranah abstrak sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang teori.

B. KOMPETENSI DASAR

3.11 Menafsirkan fungsi sosial dan unsur kebahasaan dalam lirik lagu terkait kehidupan remaja	4.11 Menangkap makna secara kontekstual terkait dengan fungsi sosial dan unsur kebahasaan lirik lagu terkait kehidupan remaja
---	---

C. MATERI PEMBELAJARAN

- Fungsi sosial : mengembangkan nilai nilai kehidupan dan karakter yang positif.

- Unsur kebahasaan :
 - Kosakata dan tata bahasa dalam lirik lagu.
 - Ucapan, tekanan kata, intonasi, ejaan, tanda baca dan tulisan tangan.
- Topik : Hal-hal yang dapat memberikan keteladanan dan menumbuhkan perilaku yang termuat di KI

D. METODE PEMBELAJARAN

- Think Pair Share Strategy
- Model cooperative learning

E. MEDIA DAN ALAT

- Media : Beberapa Gambar Lirik Lagu
- Alat : Laptop

F. SUMBER BELAJAR

- Bahasa Inggris. 2013. Kementrian Pendidikan dan Kebudayaan
- Kamus Indonesia- Inggris

G. LANGKAH-LANGKAH PEMBELAJARAN

Aktivitas	Deskripsi aktivitas	Waktu
Pembukaan	<ul style="list-style-type: none"> ➢ Guru memberi salam. ➢ Guru mengajak peserta didik untuk mengawali kegiatan dengan berdoa. ➢ Guru memeriksa kehadiran peserta didik. ➢ Guru menyiapkan peserta didik secara psikis dan fisik ➢ Guru menyampaikan cakupan materi dan uraian kegiatan sesuai RPP 	10 Menit

H. PENILAIAN HASIL PEMBELAJARAN

Speaking Measurement

Component Speaking Measurement	Points	Behavioral Statements
Pronunciations	5	Has few trace of foreign accent
	4	Always intelligible, though one is conscious of a definite accent
	3	Pronunciation problems necessitate concentrated listening and occasionally lead to misunderstanding.
	2	Very hard to understand because of pronunciation problems. Must frequently be repeated
	1	Pronunciation problems to severe as to make speech virtually un intelligible
Grammar	5	Makes few (if any) noticeable errors of grammar or word order.
	4	ccasionally makes grammatical and word order errors which do not, however, obscure meaning.
	3	Makes frequent errors of grammar and word order which occasionally obscure meaning.
	2	Grammar and word order errors make comprehension difficult. Must often rephrase sentences and/or restrict himself to basic patterns
	1	Errors in grammar and idioms is virtually unintelligible.
Vocabulary	5	Use of vocabulary and idioms is virtually that of native speaker.
	4	Sometimes uses un appropriate terms and/or rephrase ideas because of lexical inadequancies.
	3	requently uses the wrong words, conversation somewhat limited because of inadequate vocabulary.
	2	Misuse of words and very limited vocabulary make comprehension quite difficult
	1	Vocabulary limitations so extreme as to make conversation virtually impossible.
Fluency	5	Speech as fluent and effortless as that of a native speaker.
	4	Speed of speech seems to be slightly affected by language problems.
	3	Speed and fluency are rather strongly affected by language problems
	2	Usually hesitant, often forced into silence by language limitations

Comprehension	1	Speech is as halting and fragmentary as to make conversation virtually impossible
	5	Appears to understand everything without difficulty.
	4	Understands nearly everything at normal speed, although occasional repetition may be necessary.
	3	Understands most of what is said at slower than normal speed with repetitions. Has great difficulty following what is said
	2	Can comprehend only "social conversation" spoken slowly and with frequent repetition
	1	Cannot be said to understand even simple conversation English

Bahasa Inggris
Satuan Pendidikan
Kelas

SMP SEGERA 11 BENGKULU SELATAN
IX (Sembilan)

Kompetensi Inti

- KI1 dan KI2: **Menghargai dan menghayati** ajaran agama yang dianutnya serta **Menghargai dan menghayati** perilaku baik, disiplin, jujur, peduli, dan bertanggung jawab dalam berinteraksi secara efektif sesuai dengan perkembangan anak di lingkungan, keluarga, sekolah, masyarakat dan lingkungan alam sekitar, bangsa, negara dan kawasan regional
- KI3: **Memahami** dan menerapkan pengetahuan faktual, konseptual, prosedural, dan metakognitif pada tingkat teknis dan spesifik, sederhana berdasarkan rasa ingintahunya tentang ilmu pengetahuan, teknologi, seni, budaya dengan wawasan kemanusiaan, kebangsaan, dan lingkungan terkait fenomena dan kejadian tampak mata
- KI4: **Memunjukkan** keterampilan motorik, kognitif, dan menyaji secara kreatif, produktif, kritis, mandiri, kolaboratif, dan komunikatif dalam raih konkret dan karya abstrak sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang teori

Kompetensi Dasar

- 1.1 Menerapkan fungsi sosial, struktur teks, dan unsur kebahasaan teks interaksi interpersonal lisan dan tulis yang melibatkan tindakan menyatakan harapan, doa, dan ucapan selamat atas suatu keberhasilan dan prestasi, dan mengungkapkan rasa bangga dan kegembiraan yang wajar dan sesuai keperluan
- 1.2 Menerapkan fungsi sosial, struktur teks, dan unsur kebahasaan teks interaksi transaksional lisan dan tulis yang melibatkan tindakan memberi dan meminta informasi terkait maksud, tujuan, persetujuan melakukan suatu tindakan/kegiatan, sesuai dengan konteks penggunaannya (Perhatikan unsur kebahasaan *so, in order to, so that (dis)agreement*)

Materi Pembelajaran

- Fungsi sosial
 - Mengingat hubungan interpersonal dengan guru dan teman
- Struktur teks
 - Memulai
 - Memulai (diharapkan di luar dugaan)
 - Unsur kebahasaan
 - Ungkapan *I hope so, I wish you luck dll*
 - Ucapan selamat *Kita, selamat, epani (anda) laci, dan tulus dan tulus*
 - Tipe
 - Posing dan sebagainya yang dapat menimbulkan perilaku yang format di KI

- Fungsi sosial
 - Membuat rencana menunjukkan kemungkinan mengarahkan
- Struktur teks
 - Memulai
 - Menanggapi (diharapkan di luar dugaan)
 - Unsur kebahasaan
 - Kalimat *delarir* dan interaktif dengan modal *will, be going to*

Kemampuan Pembelajaran

- Menyimak, memahami, dan memperagakan beberapa contoh peragaan dengan dengan dan tekanan kata yang benar
- Mengidentifikasi ungkapan yang sedang dipelajari
- Menyajikan hal-hal yang tidak diketahui atau yang berbeda
- Menentukan ungkapan yang tepat secara lisan/tuliskan dari berbagai situasi laci yang sesuai
- Melakukan refleksi tentang proses dan hasil belajar
- Membaca beberapa teks pendek yang berisi rencana dan kemauan untuk melakukan perubahan diri
- Bertanya jawab tentang rencana dan kemauan yang disebutkan dalam teks
- Menyimak, membaca dan menuliskan, guru membacakan teks-teks tersebut dengan suara lantang
- Menyajikan hal-hal yang tidak diketahui atau yang

dan tulis sangat pendek dan sederhana yang melibatkan tindakan memberi dan meminta informasi terkait maksud, tujuan, persetujuan melakukan suatu tindakan/kegiatan dengan memperjelaskan fungsi sosial, struktur teks, dan unsur kebahasaan yang benar dan sesuai konteks

1.1 Membandingkan fungsi sosial, struktur teks, dan unsur kebahasaan beberapa teks khusus dalam bentuk label, dengan memberi dan meminta informasi terkait obat/makanan/minuman, sesuai dengan konteks penggunaannya

1.2 Menangkap makna secara kontekstual terkait dengan fungsi sosial, struktur teks, dan unsur kebahasaan teks khusus dalam bentuk label pendek dan sederhana, terkait obat/makanan/minuman

1.1 Membandingkan fungsi sosial, struktur teks, dan unsur kebahasaan beberapa teks prosedur lisan dan tulis dengan memberi dan meminta informasi terkait resep makanan/minuman dan manual, pendek dan sederhana, sesuai dengan konteks penggunaannya

1.2 Menangkap makna secara kontekstual terkait fungsi sosial, struktur teks, dan unsur kebahasaan teks prosedur lisan dan tulis, sangat pendek dan sederhana, dalam bentuk resep dan manual

- Ungkapan persetujuan: *I agree that you should do it*
- Nama tunggal dan plural dengan atau tanpa *a, the, this, those, my, their, his*
- Ucapan, tekanan kata, intonasi, jeda, tanda baca dan tulisan tangan

• Topik
Tindakan dan kegiatan peserta didik di sekolah, rumah, dan lingkungan sekitar yang dapat menimbulkan perilaku yang terpuji dan baik

• Fungsi sosial
Memilih obat/makanan/minuman yang sehat dan aman, menghindari efek negatif, dan mendapatkan hasil terbaik

• Struktur Teks
Dapat mencakup: nama asli dan nama dagang, obat deskripsi, volume, bahan, cara menggunakan, cara menyimpan, tanggal kadaluarsa

• Unsur Kebahasaan
- Istilah khusus terkait dengan produk
- Kalimat imperatif
- Tata bahasa: frasa nominal untuk menyebut benda, cara menyebut jumlah/ukuran
- Ucapan, tekanan kata, intonasi, jeda, tanda baca, dan tulisan tangan

• Topik
Informasi tentang obat/makanan/minuman sehari-hari

• Fungsi sosial
Memilih obat/makanan/minuman yang sehat dan aman, menghindari efek negatif, dan mendapatkan hasil terbaik

• Struktur Teks
Dapat mencakup:
- nama makanan, minuman, alat, mesin, bahan, aparatus yang diperlukan, cara memasak, menggunakan dalam bentuk langkah-langkah kerja secara berurutan

• Unsur Kebahasaan
- Kata kata khusus terkait dengan produk

berbeda

• Bertanya jawab dengan teman tentang rencana dan kemandirian untuk menghadapi ujian akhir sekolah

• Menyampaikan hasil temuan/nya dalam bentuk teks pendek tentang temannya

• Mempresentasikan di kelompok lain dan bertanya jawab tentang isi teks

• Melakukan refleksi tentang proses dan hasil belajarnya

• Membaca dan mengidentifikasi bagian informasi yang tertera di label obat/makanan/minuman dengan menuliskan informasi ke dalam tabel analisis

• Menpelajari contoh mempresentasikan isi label, dan kemudian belajar mempresentasikan secara lisan dengan ucapan dan tekanan kata yang benar

• Melakukan langkah-langkah yang sama yang telah dilakukan sebelumnya untuk mengamati label makanan dan minuman

• Mempresentasikan hasil analisis secara lisan di depan kelompok lain

• Melakukan refleksi tentang proses dan hasil belajarnya

• Didengarkan beberapa resep makanan/minuman oleh guru menulis dengan tangan beberapa resep di buku catatan masing-masing sambil mengucapkan setiap kata dengan ucapan dan tekanan kata yang benar

• Dengan menggunakan tabel, menganalisis struktur nomina yang digunakan untuk menyebutkan benda-benda

• Dengan cara yang sama menganalisis struktur kalimat yang menyebutkan langkah kerja

• Mencermati manual, dan berlatih membedakan

<p>3.3 Menyebutkan fungsi, nilai, struktur teks, dan unsur kebahasaan teks interaksi transaksional lisan dan tulis yang bersifat persuasif, imitatif, dan memuat informasi terkait keadaan/ tindakan/ kejadian/ kegiatan yang sedang dilakukan/ terjadi pada saat ini, waktu lampau, dan waktu yang akan datang, sesuai dengan konteks pengucapannya (perhatikan unsur kebahasaan <i>present continuous past continuous, will+continuous</i>)</p>	<p>- Frasa nominal untuk menyebut benda - kata sambung <i>for, over, the, fully</i> - Ucapan, tekanan kata, intonasi, jeda, tanda baca, dan tulisan tangan • Topik • Rincian makanan/minuman, materi peralatan yang terkait dengan kehidupan peserta didik yang dapat menimbulkan perilaku yang terpuji di KI • Fungsi sosial • Mendeskripsikan, melaporkan, membandingkan • Struktur teks • Memulai • Menanggapi (diharapkan di luar dugaan) • Isi - Kalimat deklaratif dan interrogative dalam <i>present continuous tense, past continuous, dan continuous dengan modal will</i> - Kalimat adverbial dengan kata sambung <i>when... while...</i> - Nomina singular dan plural dengan atau tanpa <i>a, the, this, those, my, their, etc</i> - Ucapan, tekanan kata, intonasi, jeda, tanda baca, dan tulisan tangan • Topik - Kegiatan/ tindakan/ kegiatan/ kejadian di rumah, sekolah, dan lingkungan sekitar peserta didik yang dapat menimbulkan perilaku yang terpuji di KI</p>	<p>dengan suara tenang, dengan sikap dan intonasi kata yang benar • Menyajikan pesan persuasif/imitatif dan bukti yang mendukung dengan fakta yang kredibel dan terdapat di dinding kelas atau majalah dinding • Melakukan refleksi tentang proses dan hasil belajarnya • Memahami dan memahami teks-teks pendek, seperti beberapa tembang krejati, kemudian siswa sedang berdiskusi pada saat ini, waktu lampau di masa lampau dan di waktu yang akan datang • Mendengarkan/ mengamati dengan penuh konsentrasi ungkapan-ungkapan yang diambil teks, dengan cermat dan tidak lupa yang benar • Bertanya jawab tentang kegiatan/peristiwa yang sedang berlangsung pada saat ini, masa lampau, di masa lampau dan di waktu yang akan datang yang dibutuhkan dalam teks lisan lisan • Mengungkapkan informasi tentang kehidupan beberapa orang dalam teks-teks pendek dan sederhana dengan menyebutkan apa yang sedang dilakukan saat ini, pada saat ini di waktu lampau dan yang akan datang • Menempatkan barannya di dinding kelas dan majalah dinding • Melakukan refleksi tentang proses dan hasil belajarnya</p>
<p>3.4 Menyusun teks interaksi transaksional lisan dan tulis yang bersifat persuasif, imitatif, dan memuat informasi terkait keadaan/ tindakan/ kejadian/ kegiatan yang sedang dilakukan/ terjadi pada saat ini, waktu lampau, dan waktu yang akan datang, dengan memperhatikan fungsi sosial, struktur teks, dan unsur kebahasaan yang benar dan sesuai konteks</p>	<p>• Fungsi sosial • Mendeskripsikan, melaporkan, menjelaskan • Struktur teks • Memulai • Menanggapi (diharapkan di luar dugaan) • Isi - Kalimat deklaratif dan interrogative dalam <i>present perfect</i> - Kalimat sambung <i>since, for</i> kata penunjuk waktu <i>now, later</i></p>	<p>• Membaca dan memahami teks-teks pendek dan sederhana tentang beberapa kejadian, kegiatan yang terjadi di masa lampau tanpa menyebutkan waktu terjadinya secara spesifik • Menemukan kalimat dengan jawaban benar yang mengungkap apa yang diambil teks, dengan cermat dan tidak lupa yang benar • Bertanya jawab tentang kegiatan/peristiwa di waktu lampau tanpa menyebutkan waktu terjadinya secara spesifik</p>

SURAT TUGAS
DEKAN FAKULTAS TARBIIYAH DAN TADRIS
UNIVERSITAS ISLAM NEGERI FATMAWATI SUKARNO BENGKULU
Nomor : 123/Un.23/T.II/PP.00.9/03/2022
Tentang
Penetapan Dosen Penguji

Ujian komprehensif mahasiswa Fakultas Tarbiyah dan Tadris UIN Fatmawati Sukarno Bengkulu atas:

Nama Mahasiswa : Neta Mela Sari
NIM : 1811230032
Jurusan/Prodi : Tadris Bahasa Inggris

Dalam rangka untuk memenuhi persyaratan tugas akhir mahasiswa Fakultas Tarbiyah dan Tadris UIN Fatmawati Sukarno Bengkulu, dekan Fakultas Tarbiyah dan Tadris UIN Fatmawati Sukarno Bengkulu dengan ini memberi tugas kepada nama-nama yang tercantum pada kolom 2 untuk menguji ujian komprehensif dengan aspek mata uji sebagaimana tercantum pada kolom 3 dengan indikator sebagaimana tersebut pada kolom 4 atas nama mahasiswa tersebut di atas

NO	PENGUJI	ASPEK	INDIKATOR
1.	Abdul Aziz Bin Mustamin, M.Pd.I	Kompetensi UIN	a. Kemampuan membaca alqur'an b. Kemampuan menulis arab c. Hafalan surat-surat pendek (Ad- Dhuha s/d An-Nas)
2	Risnawati, M.Pd	Kompetensi Jurusan/Prodi	a. Hafalan ayat dan hadist yang berhubungan dengan pendidikan b. Language skill, vocabulary, grammar, speaking, writing, reading c. Linguistics: psycholinguistics, sociolinguistics, phonology, semantic d. Teaching skill, TEFL, LTR, ESP, CMD
3	Dr.Edi Ansyah, M.Pd	Kompetensi Keguruan	a. Kemampuan memahami UU/PP yang berhubungan dengan Sistem Pendidikan Nasional b. Kemampuan memahami Kurikulum, Silabus, RPP dan Desain Pembelajaran c. Kemampuan memahami Metodologi, Media, dan Sistem Evaluasi Pembelajaran.

Adapun pelaksanaan ujian komprehensif tersebut dilaksanakan dengan ketentuan sebagai berikut:

1. Waktu dan tempat ujian diserahkan sepenuhnya kepada dosen penguji setelah mahasiswa menghadap dan menyatakan kesediannya untuk diuji.
2. Pelaksanaan ujian dimulai paling lambat 1 (satu) minggu setelah diterimanya SK Pembimbing skripsi dan surat tugas penguji komprehensif dan nilai diserahkan kepada ketua program studi paling lambat 1 (satu) minggu sebelum ujian munaqasyah dilaksanakan
3. Skor nilai ujian komprehensif adalah 60 s/d 100
4. Dosen penguji berhak menentukan LULUS atau TIDAK LULUS mahasiswa dan jika belum dinyatakan lulus, dosen diberi kewenangan dan berhak untuk melakukan ujian ulang setelah mahasiswa melakukan perbaikan sehingga mahasiswa dinyatakan LULUS
5. Angka kelulusan ujian komprehensif adalah kelulusan setiap aspek (bukan nilai rata-rata)
Demikianlah surat tugas ini dikeluarkan dan disampaikan kepada yang bersangkutan untuk dilaksanakan.
