Reviewer- A

Decision: Major revisions required

The manuscript focuses on corruption crimes and money laundering in Indonesia. The study starts by highlighting the significance of the issue, stating that corruption crimes pose a threat to the stability of the national economy and financial planning. It sets out the objectives of the study, which are to examine the role of the community in eradicating corruption and to assess the effectiveness of the Indonesian police (POLRI) investigators in preventing money laundering crimes. However, here are some observations and suggestions.

- The abstract should describe the research design and methodology used in the study. It must state that a qualitative and descriptive research design was adopted, with a pragmatic approach and a case study as the basis.
- The manuscript must present the findings of the study, indicating that corruption in Indonesia has reached a dangerous level that threatens the stability and security of the nation.
- The literature review section must provide an overview of the relevant literature on the role of the community in preventing corruption, money laundering legislation, and the role of the police in enforcing criminal law. The section must start by discussing the importance of community participation and social control in preventing corruption. It should highlight the need for law enforcement agencies to work in collaboration with the community to uphold the values of truth and justice.
- The study could benefit from providing more specific details about the methodology used and the implications of the findings. Additionally, it would be helpful to include a brief statement about the limitations of the study and areas for future research.
- It also evaluates the success or failure of the existing law on the prevention and eradication of money laundering crimes to effectively prevent corruption. The study should present a review of relevant laws, granting more investigative authority to agencies like POLRI and establishing a synergized administrative system involving legislators and crime investigators.

Reviewer -B

Decision: Major revisions required

The study focuses on the role of the police in enforcing criminal law, particularly in investigating money laundering crimes. It highlights the authority of the police to conduct investigations and refers to studies that argue for community-based policing models to strengthen police accountability and responsiveness to public needs. However, here are some important points that authors must focus on.

1. The literature review section should highlight money laundering legislation in Indonesia, noting the positive direction shown by the enactment of laws concerning the prevention and eradication of money laundering crimes. It should mention the increased awareness and efforts of financial service providers, regulatory agencies, and the Financial Transaction Reports and Analysis Center (PPATK) in implementing the reporting obligations and conducting analysis activities.
2. The study should cite recent literature to support the argument that corruption is a result of weak social control and emphasizes the role of social control in defining and deterring deviant behavior.
3. The methodology section briefly describes the research design and approach used in the study. It should also state the process and method of the data collection. How was the data analysis conducted?
4. The discussion should provide an overview of Law Number 31 of 1999 and Law Number 20 of 2001, which outline regulations regarding community participation in preventing and eradicating corruption. The review must accurately present the provisions of these laws, including the rights and responsibilities of the community in combating corruption.
5. Likewise, the authors should focus on the fact that many law enforcers from the prosecutor's office are not aware of the Government Regulation Number 71 of 2000, which further regulates community participation. This raises concerns about the implementation and effectiveness of these regulations. It would be helpful to provide more information on the reasons behind the lack of awareness and potential solutions to address this issue.

Response to Reviewers

No.	Reviewer's Comment	Response
	The authors have done a good job in the first round of reviews. Here are some minor suggestions.	Thanks a lot, dear reviewer.
1	The authors should add a separate section explaining the authority of the Indonesian National Police (POLRI) investigators in dealing with money laundering crimes under the heading "Authority of POLRI Investigator in Money Laundering Crime."	Thank you for your kind suggestions. I have added a separate section explaining the authority of the Indonesian National Police (POLRI) investigators in dealing with money laundering crimes under the heading "Authority of POLRI Investigator in Money Laundering Crime." Please see pages 16
2	There should be a detailed discussion regarding the interpretation and application of Article 69 of Law Number 8 of 2010.	Dear reviewer, Thank you for your kind comments. I have added a detailed discussion regarding the interpretation and application of Article 69 of Law Number 8 of 2010. Please see page 18
3	The discussion section must also highlight the potential lack of legal certainty and the need for further clarification. It would be beneficial to provide more analysis and opinions from legal experts on the interpretation of this article and its implications for investigations.	Dear reviewer, Done dear reviewer. Please see page 19
